Besides above- mentioned motors, brands Mitsubishi, Yanmar, Cummins are optional, forklifts specifications changes according to the engines.

Notes:

Vertical axis represents load capacity; Horizontal axis shows load center, Load center is determined from front face of the fork.
 Capacity based on a 1000mm cube load configuration with the center of gravity at the true center of the cube, and standard fork.
 The load capacity will be reduced while the mast tilt forward or loading with long fork or lifting transformable width of goods.
 Getting the load capacities at the various load centers timely via the load curve.
 TEU's products and specifications change without prior notice.
 TEU forklift truck has equipped with standard safety device.
 TEU is not responsible for the damage occurred by removing its safety device.
